SECTION 1 SCOPE OF WORK AND SPECIFICATIONS

1.1 Description

The purpose of this request is to solicit Proposals from qualified proposing firms, hereafter referred to as "Offerors", certified to sell and maintain a Digital Docket Display System for York County Government.

1.2 Background

York County implemented BrightSign Digital Signage Hardware (model XD1034) and consumer model displays in January of 2019. If the BrightSign players cannot be reused, these will need to be replaced with industry standard software and/or hardware. There are currently 5 displays at York County Family Court facility that should remain, and there are currently 7 displays at our Moss Justice Center that should remain.

1.3 Scope

The Offeror will work with York County IT to gather requirements and shall design and build a system which will operate all Digital Docket Displays in York County with all required options available and controllable by York County IT or it's designees.

Digital Docket Display must meet the following requirements:

- Ability to view and control all of the existing displays by a small number of administrators while a designated local administrator can also view and control only the displays at their location. (i.e. the Family Court administrator will need the ability to control the 5 displays at Family Court, but should not have the ability to view or control the 7 displays at the Moss Justice Center; and the Moss Justice Center administrator should have the ability to control the 7 displays at the Moss Justice Center, but should not have the ability to view or control the 5 displays at Family Court).
- York County approved media hardware and/or software.
- Ability to import data from a CSV file, filtered appropriately by time and location (specific courtroom), and displayed accordingly on corresponding displays.
- Able to be hosted onsite with no need to connect to a cloud-based solution.
- Centralized management with York County designee having full access to turn features on or off.
- Consultation to set up the most efficient way to do business.
- Full inventory list with location of each device after implementation.

The Offeror will work with York County staff to create an implementation plan that will include training and deployment of hardware and software. Offeror's staff to be onsite to work with York County staff during the implementation and installation of the Digital Signage Docket Displays to ensure everything is working as planned.

1.4 Standard

The Digital Docket Display system for York County Government must operate as intended at all times. Offeror must have a plan for redundancy across diverse paths so that no single point of failure is the cause of an outage. A network connection is provided at each location. A loop out port is not to be used to connect multiple displays.

1.5 Acceptance Testing

Offeror must ensure that data can be imported from a CSV file, filtered appropriately by time and location, and displayed accordingly on corresponding displays. Offeror must verify that any other options that are turned on are working as intended, and that an administrator can turn on or off all features without a need to call for support.

1.6 Existing Building Conditions

All locations that require Digital Docket Display currently have displays mounted and network in place.

1.7 Materials

Digital Signage players, mounts (if required), and corresponding hardware should be included in the project and current hardware removed and given to the designated York County representative if they cannot be reused. York County can provide Power Over Ethernet (POE) in most locations, but a separate power cable should be included in case standard building power is needed.

1.8 Delivery Schedule

The installation of the Digital Docket Display solution must be completed by September 1, 2023. Offeror must provide a Final Report documenting:

- The equipment installed
- Operator and maintenance manuals
- Licenses obtained if required
- Warranties and Guarantees
- Installing Offerors Contact information and point of contact for warranty service

1.9 Maintenance and Warranty

Hardware must include a full maintenance agreement to repair or replace any device for three (3) years and must be included in the cost. A breakdown of future maintenance costs for up to Five (5) years must also be included in the documentation.

1.10 General Services
